

Bestfresh SV

Carboxymethylcellulose Sodium 1% Preservative Free Lubricant Eye Drops

Composition

Bestfresh SV Preservative Free Lubricant Eye Drops: Each mL contains Carboxymethylcellulose Sodium USP 10 mg.

Pharmacology

Carboxymethylcellulose Sodium increases tear viscosity and pseudoelastic properties. It is an ionic polymer containing carboxyl and hydroxyl groups. Its chemical structure is similar to mucin in the tear film and shows mucoadhesive properties. These properties promote prolonged retention time on the eye and alleviate the symptoms of tear deficiency.

Indications

Temporary relief of burning, irritation and discomfort due to dryness of the eye or exposure to wind or sun.

Dosage & Administration

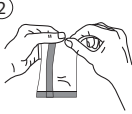

Instill 1 or 2 drops in the affected eye(s) as needed or as advised by the registered physician.

①

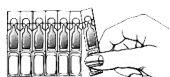

Wash hands before using the single vial

②

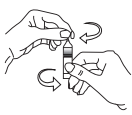

Open the pillow pack & remove the strip of single vial

③

Break off one single vial from the strip. Keep the remaining strip of single vials back in the pillow pack

④

Hold the single vial by the label end and twist the cap off.

⑤

Pull down your eyelid with a clean finger.

⑥

Bring the single vial tip close to the eye, but be careful not to touch your eye.

⑦

Gently press the single vial to release of one drop of medicine fall inside the lower eyelid.

⑧

Gently close your eyes few minutes after administration. Press a finger corner of the eyes by the nose for about 1 or 2 minutes.

Contraindications

Contra-indicated in patients with previously demonstrated hypersensitivity to any of the ingredients.

Side Effects

Visual disturbances, ocular discharge, eye pruritus, eye irritation, burning and discomfort, palpebral/conjunctival hyperaemia were reported.

Warnings & Precautions

Concomitant ocular medication should be administered 15 minutes apart to the instillation of this eye drop.

Stop use and ask a doctor if you experience any of the following:

- eye pain
- changes in vision
- continued redness or irritation of the eye
- condition worsens or persists longer than 72 hours

Do not pierce with needles

Do not cut with scissor or knife

Do not touch the nozzle/single vial tip

Close the upper part of the cap with the single vial just after the use

Discard after 12 hours of opening & keep the vial in bin

Special Guideline

- ❖ If more than one topical ophthalmic product is to be used, other eye drops should be instilled at least 5 to 10 minutes apart.
- ❖ If using two types of eye medications such as solution and suspension, use the solution first and then use suspension.
- ❖ If using eye drops and an eye ointment, use the eye drops first then apply the ointment at least 10 minutes later.
- ❖ Don't share eye drops with another persons because sharing drops could spread germs and infection.
